Washington, DC—Formtek, Inc. a leading provider of Enterprise Content Management (ECM) software and implementation services, today announced a partnership with the Advanced Concepts Center (ACC). Together these companies teamed to provide an intensive training workshop to a civilian agency that is responsible for developing the IT infrastructure for an international military organization. The ACC is delivering a series of knowledge transfer sessions focused on processes & practices to design sound architectures to support the complex weapons acquisition process.

“This is a relationship between companies that truly complements each other’s skills,” said Dennis Scanlon COO of Formtek. “The ACC provides in depth knowledge of the theory and tools required to build an enterprise architecture and Formtek provides the relevant case studies based on implementation experience and best practices.”

Formtek, now working as a sub-contractor to a major US aerospace & defense company, has led this project for the past several years. This effort has included the jointly developed knowledge transfer sessions to support the client’s strategic goals and delivery, by Formtek, of Hangul localized enterprise document management and collaboration products to meet short-term tactical goals. The combination of the strategic and tactical deliveries provides a foundation for the development of a next generation Information Technology infrastructure. “A strength of the ACC is the collaboration with our clients, especially quality focused organizations like Formtek, to design and develop learning solutions that meet the business objectives of the end user,” said Dave Bieg, ACC Managing Partner. “In this case Formtek and the ACC are enabling the end client to confidently implement their next generation IT infrastructure.”

About Formtek. Formtek Inc. provides secure and scalable Enterprise Content Management software and implementation services to worldwide customers and

partners in manufacturing, aerospace, defense, telecommunication, utility and government. Formtek software provides discriminating features in the areas of security, storage, scalability and integration capability and is readily used for applications of document management, content management, digital asset management and collaboration. Formtek is headquartered in Washington, DC, with offices in California, Pennsylvania, and Florida. For more information, please visit www.formtek.com.

About Advanced Concepts Center, LLC. Headquartered in Roswell, Georgia, the Advanced Concepts Center, LLC is a commercial learning solutions company focused on educating information technology professionals in IT concepts, software development methodologies, processes, project management, databases, operating systems and programming languages. These services are delivered via classroom training, e-learning, hands-on application and mentoring. The ACC offers a broad range of powerful knowledge transfer products that can be designed into full service ACC corporate learning solutions that rapidly build IT skill proficiency. From objects, components, and design architectures, to databases, UNIX, and Windows, through J2EE and web development, the ACC provides cost competitive and cost effective solutions. Whether a small, technology focused group or a large enterprise, the ACC blends curriculums and delivery options with expert technology practitioners to offer the highest quality, IT learning and retention experience possible. The ACC prides itself on learning the business, and tailoring the solution, to address our clients' specific needs.
