Washington, DC—Formtek Inc., a leading provider of Enterprise Content Management (ECM) software and implementation services, announced today the release of Formtek | Orion 5 Desktop Documents. This product allows seamless integration between Formtek | Orion's content manager and popular Microsoft® Office applications. With this release, users can now securely store information directly from Microsoft Word, Excel, PowerPoint, and Outlook, and manage these files using Windows Explorer.

"Formtek users will now be able to secure their unprotected desktop data within the Formtek structure," said Dick Weisinger, Formtek's Chief Technologist. "The seamless interface between Formtek | Orion and Windows will increase productivity and provide our users a secure structure for storage of valuable company data."

Formtek | Orion 5 Desktop Documents organizes previously unstructured corporate assets, reduces the cost of search and retrieval, and secures previously unprotected information. It also adheres to open standards to ensure compatibility with existing environments. The look and feel is identical to the Windows Desktop and integrates with the folder structure and pull-down menus, ensuring ease of access to content management functions. This allows users to immediately take advantage of Formtek's content manager for securing desktop data without training.
