Washington, DC-Formtek, Inc., a leading provider of Enterprise Content Management (ECM) software and implementation services, announced today that the 92nd Civil Engineering Squadron (CES) at Fairchild Air Force Base (AFB) has selected the Formtek | Orion ECM Solution to store and manage their engineering documentation. The effort involves conversion of tens of thousands of legacy facility documents to electronic format and the implementation of a content and compliance management system with high security, access controls and standards compliance. The Formtek | Orion Solution will provide Fairchild AFB with electronic content access, improved configuration management, security, collaboration, enhanced search and interfaces.

The 92nd CES has, over the past 50 years, built a large library of hardcopy and electronic engineering drawings (CAD generated and manually drafted), and documentation for its facilities management. Formtek has been selected to ensure quality creation of a secure repository based on the Formtek Facilities Management (FM) Business Application Solution, which will store electronic files and related index information to facilitate access and management of this information while maintaining the security requirements mandated by Federal Regulations. Formtek is also responsible for providing necessary training and knowledge transfer to the 92nd CES support personnel responsible for the day-to-day system management and for tailoring and scaling the FM solution to meet future requirements.

“The 92nd CES is a good example of how Formtek solutions and services can move an organization to the latest Enterprise Content Management technologies quickly and cost effectively by applying our experience in Aerospace & Defense, Discrete Manufacturing and

-more-

Engineering.” said Gary Mann CEO of Formtek, “We sincerely appreciate adding the 92nd Civil Engineering Squadron (CES) at Fairchild Air Force Base to our growing client portfolio”.

About Fairchild AFB. The 92nd Air Refueling Wing is one of the largest air refueling wings in the Air Force. The base is home to not only the 92nd ARW, but also the U.S. Air Force Survival School, Washington Air National Guard’s 141st Air Refueling Wing, and Detachment 13, an Air Education and Training Command unit that provides maintenance training for KC-135 aircraft systems and associated support, and several other smaller Air Force units.

The base employs more than 3,000 active duty men and women, and approximately 1,000 civilian employees, with an annual payroll of more than \$80 million. The base’s total population, counting active duty family members, Air Force Guard and Reserves is nearly 10,000. The total economic impact of Fairchild AFB on the local area is approximately \$450 million.

About Formtek. Formtek Inc. provides secure and scalable Enterprise Content Management software and implementation services to worldwide customers and partners in manufacturing, aerospace, defense, telecommunication, utility and government. Formtek software provides discriminating features in the areas of security, storage, scalability and integration capability and is readily used for applications of document management, content management, digital asset management and collaboration. Formtek is headquartered in Washington, DC with offices in California and Pennsylvania. For more information, please visit www.formtek.com.
