-----------------	--	--

Washington, DC— Formtek, Inc., a leading provider of Enterprise Content Management (ECM) software and implementation services, announced today the release of Formtek | Orion 5 Software Development Kit (SDK) and a key feature of the architecture stack called DocDomain. SDK allows developers to easily embed Enterprise Content Management functionality within applications.

“The Software Development Kit gives our clients true flexibility,” said Dick Weisinger, Formtek’s Chief Technologist. “Our customers will be able to quickly and easily build Web-based and client-server content management applications.”

The Formtek | Orion 5 Software Development Kit is one of the solutions in the suite of User Interface tools from the Formtek Orion 5 Foundation. The key enhancements for this new release include increased configurability for achieving corporate firewall compliance, improved performance, better transaction handling, and easier installation and configuration. The product also offers better working list capability, enhanced Access Control Lists (ACL), and query implementation.

SDK is written in Java using a highly scalable distributed-object architecture that offers access to Formtek | Orion 5 functionality using industry standards. The Software Development Kit allows application development in an Object-Oriented environment. The interface is extendable through inheritance and delegation using Object-Oriented design principles.

About Formtek. Formtek Inc. provides secure and scalable Enterprise Content Management software and implementation services to worldwide customers and partners in manufacturing, aerospace, defense, telecommunication, utility and government. Formtek software provides discriminating features in the areas of security, storage, scalability and integration capability and is readily used for applications of document management, content management, digital asset

management and collaboration. Formtek is headquartered in Washington, DC, with offices in California and Pennsylvania. For more information, please visit www.formtek.com.
