Concord, California USA and Taipei, Taiwan — Formtek Inc., a leading provider of Enterprise Content Management solutions, and Fortune Information Systems Corporation (Taiwan Stock Exchange Symbol: **FIS**, Code 2468) a leading Information Technology solutions provider, today announced that Fortune Information Systems Corporation has implemented the latest version of Formtek's ECM technology, now available in Traditional Chinese. By virtue of a previously signed Collaborative Partnership Agreement, FIS will be able to offer this software, along with their own modifications, to the Chinese markets, including Taiwan, Mainland China, Hong Kong, and Macau.

Formtek's latest ECM technology, Formtek | Orion version 5.4 (Orion 5), includes many additional features. These enhancements include a tighter integration with Microsoft's Active Directory, file encryption for additional security, improved password protection, the addition of Firefox as a supported browser, and additional auditing features. Those new features allow customers to more easily implement Orion within their existing IT environment. Moreover, Orion 5.4 embeds a newly developed unique encryption mechanism to ensure the safety of enterprise content.

"This release represents a significant step forward to our Orion 5 product," said Dennis M. Scanlon, Formtek's President and COO, adding "Formtek's ECM technologies, including the extensive JAVA API and Web Services software development tools, allow FIS to develop, customize and integrate best-in-class solutions with user interfaces and unique integrations specific to the Taiwanese and Greater China regional markets. Of course, customers also can easily develop new integration with these tools as they need. We remain steadfast and dedicated in our efforts to provide FIS with the continuous support and assistance necessary to ensure mutual success over the long term."

"The additions to the Orion 5 product will prove beneficial to our customer base," said Chairman James C.Y. Lee of FIS. "Our mission as FIS is to stay on the forefront of secure information technology trends such that we can develop and serve our customers to the fullest extent possible. Our relationship with Formtek made the enhancements delivered with this release possible."

About Fortune Information Systems Corporation (FIS) - The Company was founded in June 1982.
