-----------------	--	--

**Washington, DC**— Formtek, Inc., a leading provider of Enterprise Content Management (ECM) software and implementation services, today announced it added an additional level of security to its flagship software technology. Formtek's High Security Module, which is now embedded as part of the Formtek core architecture, provides system administrations with 57 discrete user privilege settings, offering organizations greater flexibility in protecting their information that is stored with Formtek's Enterprise Content Management software.

"This new level complies with even the most stringent security requirements of our largest defense-industry clients and their extremely complex firewall configurations," said Dennis M. Scanlon, Chief Operating Officer of Formtek. "We've taken our security features to the next level by creating a secure configuration for the Formtek inter-networking software components."

System administrators can now create Access Control Lists (ACLs), adding an additional level of security for all content objects used in daily business process management activities. These ACLs map access restrictions between object lifecycle states—such as design or release—and user groups (e.g. engineering, sales, finance).

Formtek ACL restrictions ensure that at a given stage, content objects can only be seen and modified by authorized users—an essential function for organizations that constantly handle sensitive business data.

**About Formtek.** Formtek Inc. provides secure and scalable Enterprise Content Management software and implementation services to worldwide customers and partners in manufacturing, aerospace, defense, telecommunication, utility and government. Formtek software provides discriminating features in the areas of security, storage, scalability and integration capability and is readily used for applications of document management, content management, digital asset management and collaboration. Formtek is headquartered in Washington, DC, with offices in California and Pennsylvania. For more information, please visit [www.formtek.com](http://www.formtek.com).
